

Lattice Multiplication

Worked demo • Follow each step down your column. Small orange numbers show carries.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth
The Full Question	43×6	34×12	$4,312 \times 56$
1. Draw Grid & Arrange Digits	2 columns $\times$ 1 row. Top: 4, 3. Right: 6.	2 columns $\times$ 2 rows. Top: 3, 4. Right: 1, 2.	4 columns $\times$ 2 rows. Top: 4, 3, 1, 2. Right: 5, 6.
2. Find & Fill Cell Products	Cells: 24, 18. Tens above; units below. 	Top: 03, 04. Bottom: 06, 08. Keep the tens zeros. 	Top: 20, 15, 05, 10. Bottom: 24, 18, 06, 12. 
3. Sum Diagonals & Track Carries	Start at the bottom right: 8 $\rightarrow$ write 8 1 + 4 = 5 $\rightarrow$ write 5 2 $\rightarrow$ write 2	Start at the bottom right: 8 $\rightarrow$ write 8 4 + 0 + 6 = 10 $\rightarrow$ write 0, carry 1 0 + 3 + 0 + 1 = 4 $\rightarrow$ write 4 0 $\rightarrow$ leading zero	Start at the bottom right: 2 $\rightarrow$ write 2 1 + 6 + 0 = 7 $\rightarrow$ write 7 0 + 8 + 1 + 5 = 14 $\rightarrow$ 4, carry 1 1 + 4 + 0 + 5 + 1 = 11 $\rightarrow$ 1, carry 1 2 + 0 + 1 + 1 = 4 $\rightarrow$ write 4 2 $\rightarrow$ write 2
4. Write Final Answer	$43 \times 6 = 258$	$34 \times 12 = 408$	$4,312 \times 56 = 241,472$

Lattice Multiplication

Step-by-step practice 1 • Complete each step in your booklet or webapp.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth
The Full Question	53×7	24×15	$1,245 \times 32$
1. Draw Grid & Arrange Digits	Draw the grid and diagonals. First number across the top; second number down the right edge.	Draw the grid and diagonals. First number across the top; second number down the right edge.	Draw the grid and diagonals. First number across the top; second number down the right edge.
2. Find & Fill Cell Products	Multiply each row and column digit. Tens above; units below. Write a tens zero if the product is below 10.	Multiply each row and column digit. Tens above; units below. Write a tens zero if the product is below 10.	Multiply each row and column digit. Tens above; units below. Write a tens zero if the product is below 10.
3. Sum Diagonals & Track Carries	Start at the bottom right. Add each diagonal and any carry. Write its result digit at the bottom end. Put the next carry at the bottom end of the next diagonal in smaller text.	Start at the bottom right. Add each diagonal and any carry. Write its result digit at the bottom end. Put the next carry at the bottom end of the next diagonal in smaller text.	Start at the bottom right. Add each diagonal and any carry. Write its result digit at the bottom end. Put the next carry at the bottom end of the next diagonal in smaller text.
4. Write Final Answer	Read down the left edge, then along the bottom. Omit leading zeros.	Read down the left edge, then along the bottom. Omit leading zeros.	Read down the left edge, then along the bottom. Omit leading zeros.

Lattice Multiplication

Step-by-step practice 2 • Complete each step in your booklet or webapp.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth

Bus Stop Division

Worked demo • Guided: exact answer. Core: remainder. Depth: decimal answer.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth
The Full Question	$63 \div 3$	$145 \div 6$	$4,834 \div 5$
1. Draw Frame & Position Digits	Inside: 63. Outside on the left: 3. 21 3 63	Inside: 145. Outside on the left: 6. 24 6 145 remainder 1	Inside: 4,834. Outside on the left: 5. 966.8 5 4834.0
2. Divide Left-to-Right & Carry	$6 \div 3 = 2$. Write 2 above 6. $3 \div 3 = 1$. Write 1 above 3.	$1 \div 6 = 0 \text{ r } 1 \rightarrow$ carry 1 to make 14. $14 \div 6 = 2 \text{ r } 2 \rightarrow$ carry 2 to make 25. $25 \div 6 = 4 \text{ r } 1$.	$4 \div 5 = 0 \text{ r } 4 \rightarrow$ make 48. $48 \div 5 = 9 \text{ r } 3 \rightarrow$ make 33. $33 \div 5 = 6 \text{ r } 3 \rightarrow$ make 34. $34 \div 5 = 6 \text{ r } 4$.
3. Track Remainders or Decimals	There is no final remainder. The answer is a whole number.	The final remainder is 1. Write r 1 after the quotient.	Add a decimal point and a zero. Carry 4 to the zero to make 40. $40 \div 5 = 8$. Write 8 after the decimal point. The remainder is now 0.
4. Write Final Quotient	$63 \div 3 = 21$	$145 \div 6 = 24 \text{ r } 1$	$4,834 \div 5 = 966.8$

Bus Stop Division

Step-by-step practice 1 • Core: give remainders. Depth: give decimal answers.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth
The Full Question	88 ÷ 4	130 ÷ 4	5,122 ÷ 4
1. Draw Frame & Position Digits	Draw the frame. Dividend inside; divisor outside on the left. Space the digits clearly.	Draw the frame. Dividend inside; divisor outside on the left. Space the digits clearly.	Draw the frame. Dividend inside; divisor outside on the left. Space the digits clearly.
2. Divide Left-to-Right & Carry	Work left to right. Write how many whole times the divisor fits above the matching digit. Carry the remainder as a small prefix to the next digit.	Work left to right. Write how many whole times the divisor fits above the matching digit. Carry the remainder as a small prefix to the next digit.	Work left to right. Write how many whole times the divisor fits above the matching digit. Carry the remainder as a small prefix to the next digit.
3. Track Remainders or Decimals	Check the final remainder. Core: write any remainder as r. Depth: add a decimal point and zeros. Continue until the remainder is 0.	Check the final remainder. Core: write any remainder as r. Depth: add a decimal point and zeros. Continue until the remainder is 0.	Check the final remainder. Core: write any remainder as r. Depth: add a decimal point and zeros. Continue until the remainder is 0.
4. Write Final Quotient	Write the complete answer. Keep place-value zeros. Align decimal points.	Write the complete answer. Keep place-value zeros. Align decimal points.	Write the complete answer. Keep place-value zeros. Align decimal points.

Application to Exam Problems

Worked demo • Choose the calculation, use a written method, then check.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth
The Full Question	84 tins are shared equally among 4 boxes. How many tins go in each box?	130 biscuits are packed in packs of 6. How many completely full packs can be made?	145 students need minibuses with 9 passenger seats each. Hire costs £40 per minibus. Find the total cost.
1. Keywords & Calculation	“shared equally” among 4 boxes $84 \div 4$	“packs of 6”; “completely full” $130 \div 6$	“9 passenger seats”; “£40 per minibus” $145 \div 9$, then buses $\times 40$
2. Written Method	Bus stop: $8 \div 4 = 2$; $4 \div 4 = 1$. $84 \div 4 = 21$. 21 4 84	Bus stop: $13 \div 6 = 2 \text{ r } 1$; $10 \div 6 = 1 \text{ r } 4$. So $130 \div 6 = 21 \text{ r } 4$. 21 6 130 remainder 4	Bus stop: $14 \div 9 = 1 \text{ r } 5$; $55 \div 9 = 6 \text{ r } 1$. So $16 \text{ r } 1 \rightarrow 17$ buses. Lattice: $17 \times 40 = 680$. 16 9 145 remainder 1 17 9 145 remainder 1
3. Ballpark Check & Math	$80 \div 4 = 20$. 21 is close to 20.	$120 \div 6 = 20$. 21 full packs is reasonable.	$150 \div 10 \approx 15$; $15 \times 40 = 600$. £680 is reasonable: more buses are needed.
4. Final Answer	21 tins per box	21 full packs; 4 biscuits left	£680 to hire 17 minibuses

Application to Exam Problems

Step-by-step practice 1 • Decide which calculation(s) each question needs.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth
The Full Question	42 packs each contain 15 pens. How many pens are there?	215 apples go into bags of 6. How many completely full bags can be made?	A painter charges £18 per hour for 32 hours, plus £120 for paint. Find the total bill.
1. Keywords & Calculation	Identify the keywords. Write down the calculation(s) you need to do.	Identify the keywords. Write down the calculation(s) you need to do.	Identify the keywords. Write down the calculation(s) you need to do.
2. Written Method	Set up and use the written method for your calculation(s).	Set up and use the written method for your calculation(s).	Set up and use the written method for your calculation(s).
