

Ratio: sharing and missing amounts

Worked demo • Follow each step down your column.

	Thread 1: Guided	Thread 2: Core	Thread 3: Depth
The Full Question	A and B share £120 in the ratio 2:3. How much does B receive?	Red and blue paint are mixed in the ratio 3:5. There are 18 litres of red paint. How many litres of blue paint are needed?	Red and blue counters are in the ratio 3:7. There are 28 more blue counters than red counters. How many counters are there altogether?
Keywords & Calculation	“share £120”: the total is known. $2 + 3 = 5$ parts. $£120 \div 5$, then $\times 3$.	“18 litres of red”: 3 parts are known. $18 \div 3$, then $\times 5$.	“28 more blue”: the difference is known. $7 - 3 = 4$ parts. $28 \div 4$, then $\times (3 + 7)$.
Written Method	$£120 \div 5 = £24$ per part. $£24 \times 3 = £72$. A B £120 altogether 1 part = £24	$18 \div 3 = 6$ litres per part. $6 \times 5 = 30$ litres. Red Blue Red: 18 litres 1 part = 6 litres	$28 \div 4 = 7$ counters per part. $3 + 7 = 10$ parts. $7 \times 10 = 70$ counters. Red Blue 4 extra parts = 28 counters 1 part = 7 counters
Ballpark Check & Math	B gets more than half of £120, so more than £60. £72 fits. Check both shares: $£48 + £72 = £120$.	Blue is between one and two times the red amount, so between 18 and 36 litres. 30 litres fits.	The total represents 10 parts and the difference 4. The total should be between 2 and 3 times 28: between 56 and 84. 70 fits.
Final Answer	B receives £72.	30 litres of blue paint.	70 counters altogether.

1 Sam and Jo share £60 in the ratio 2:3. How much does Jo receive?	1 Flour and sugar are mixed in the ratio 3:2. A recipe uses 180 g of flour. What is the total mass of the mixture?	1 Two ropes have lengths in the ratio 1:3. The longer rope is 12 m longer than the shorter. Find their total length.
2 A drink contains 600 ml of juice and water in the ratio 1:4. How much juice is in the drink?	2 Adult and child tickets sell in the ratio 5:3. There are 16 more adult tickets. How many child tickets are sold?	2 Red and blue counters are in the ratio 1:5. There are 24 fewer red than blue. Find the number of each colour.
3 A 96 cm ribbon is cut into two pieces in the ratio 5:7. Find the length of each piece.	3 Ropes A and B have lengths in the ratio 4:7. Rope B is 15 m longer than rope A. How long is rope A?	3 Ava and Leo share £100 in the ratio 7:3. How much more does Ava receive than Leo?
4 Red and blue beads are in the ratio 3:5. There are 12 more blue beads than red beads. How many blue beads are there?	4 Mia and Ben receive money in the ratio 2:5. Mia receives £18. How much do they receive altogether?	4 Flour and sugar have masses in the ratio 5:4. There is 300 g of sugar. Find the total mass.
5 Flour and sugar are mixed in the ratio 5:2. There is 150 g more flour than sugar. How much flour is there?	5 Juice and water are mixed in the ratio 2:7. There are 63 litres of water. How much juice is needed?	5 A 1,400 ml drink has water and juice in the ratio 6:1. Find the volume of each ingredient.
6 Practice and rest times are in the ratio 2:1. Practice lasts 36 minutes. How long is the rest?	6 Travel and sightseeing take 55 minutes in total, in the ratio 3:8. How long is spent sightseeing?	6 Practice and rest times are in the ratio 6:5. Practice lasts 54 minutes. Find the total session time.

1 A 560 g snack mix contains raisins and nuts in the ratio 1:7. Find the mass of raisins.	1 A walk has uphill and level sections in the length ratio 1:8. The uphill section is 3 km. Find the total distance.	1 Flour and butter have masses in the ratio 9:2. There is 280 g less butter than flour. Find the total mass.
2 Fences A and B have lengths in the ratio 7:6. Fence A is 9 m longer than fence B. How long is fence B?	2 A 490 ml paint mix contains red and white paint in the ratio 3:4. Find the volume of red paint.	2 Tanks A and B hold water in the ratio 3:8. Tank A holds 15 litres. How much more water is in B than A?
3 A 45-minute lesson has instruction and practice in the ratio 1:2. How long is spent practising?	3 Eve and Max share money in the ratio 8:5. Eve gets £21 more than Max. How much does Max get?	3 Reading and writing take 78 minutes in total, in the ratio 4:9. Find both times.
4 Kim and Ali receive money in the ratio 7:5. Kim gets £56. How much does Ali receive?	4 Study and break times are in the ratio 5:1. Studying takes 48 minutes longer than breaks. How long are the breaks?	4 Two pieces of wood have lengths in the ratio 5:9. The longer is 28 cm longer. Find the longer length.
5 Red and white flowers are in the ratio 4:5. There are 7 more white than red. How many are white?	5 A 300 g mix contains raisins and oats in the ratio 7:8. Find the mass of raisins.	5 Nia and Tom share £208 in the ratio 7:9. How much more does Tom get than Nia?
6 Blue and white paint are mixed in the ratio 1:3. There is 180 ml of white paint. Find the total volume.	6 A farm has sheep and goats in the ratio 9:1. There are 72 sheep. How many animals are there altogether?	6 Adult and child tickets sell in the ratio 9:8. There are 81 adult tickets. Find the total number of tickets.

1 A club has 80 junior and senior members in the ratio 7:3. How many members are seniors?	1 Study and break times are in the ratio 8:1. Study takes 64 minutes. Find the total time.	1 Two sessions have durations in the ratio 1:10. The second lasts 72 minutes longer. Find the first session's duration.
2 Milk and coffee are mixed in the ratio 4:1. There is 100 ml of coffee. Find the volume of milk.	2 Rods A and B have lengths in the ratio 5:8. Rod B is 21 mm longer than rod A. How long is rod B?	2 Kai and May receive money in the ratio 9:5. May gets £60. Find their combined amount.
3 Dan and Pat share money in the ratio 1:6. Pat gets £70 more than Dan. How much does Dan get?	3 A recipe uses flour and butter in the ratio 4:3 by mass. There are 90 g of butter. Find the total mass.	3 A farm has 143 sheep and goats in the ratio 10:3. How many more sheep are there than goats?
4 Action and dialogue times are in the ratio 5:6. Dialogue lasts 15 minutes longer. How long is the dialogue?	4 Green and yellow beads are in the ratio 7:8. There are 3 more yellow than green. How many are yellow?	4 Milk and water have volumes in the ratio 10:7. There is 500 ml of milk. How much less water is there than milk?
5 A 800 g fruit mix contains apples and pears in the ratio 7:1. Find the mass of pears.	5 Sam and Jo share £90 in the ratio 9:1. How much does Jo receive?	5 Two paths have lengths in the ratio 4:9. The longer is 35 m longer. Find their combined length.
6 Wire pieces A and B have lengths in the ratio 7:6. A is 84 cm long. Find the length of B.	6 Concentrate and water are mixed in the ratio 2:9. There is 675 ml of water. Find the total volume.	6 A 950 g mix contains oats and raisins in the ratio 10:9. Find the mass of each ingredient.
